House Republican Conference  
U.S. House of Representatives  
Washington, DC 20515

Dear House Republican Conference:

Investing in the nation's infrastructure provides far-reaching economic and quality of life benefits, but these improvements depend on the continuity and predictability of funding supported by a healthy Highway Trust Fund (HTF).

The *One Big Beautiful Bill* Act provides an opportunity to address a long-standing inequity by extending the HTF's user fee structure to drivers of electric and hybrid vehicles. The nation's vast unmet highway and bridge needs demand that all who benefit from this system support its maintenance and upkeep.

Further, the HTF has not seen new revenue in a quarter century, while the vehicle fleet and its efficiency have changed significantly.

We, the undersigned organizations, ask all members of the House Republican Conference to support this legislation on the House floor. We look forward to working with you to ensure all users of the nation's transportation systems pay equitably for its maintenance and expansion.

Sincerely,
