

We must preserve consumer choice, maintain safety, and enable healthy competition in auto markets by ensuring Americans have access to reliable and affordable vehicles. The Biden administration continues restricting an individual's agency by effectively mandating a sales ban on combustion engine vehicles, instead favoring "zero-emission vehicles". We commend Reps. Walberg and Clyde for leading H.R. 4468, pushing back against Biden's gas car ban agenda.

A handwritten signature in black ink, appearing to read "Ryan Walker".
