**RE: Suniva Support for Tax Reforms**

Dear Speaker Mike Johnson and Chairman Jason Smith;

Suniva, the largest solar cell manufacturer in North America, based in Norcross, Georgia, applauds the efforts by the Ways & Means Committee and the House of Representatives to ensure that American tax dollars are used to support American manufacturers and American workers.

The reforms to the Advanced Manufacturing Production credit (Sec. 45X) will provide vital support to US manufacturers and incentivize additional investment in the development of a US supply chain for the solar industry. Suniva intends to continue working with the House, Senate and the Administration to ensure enactment of policies that support American manufacturers and workers.

Suniva looks forward to working with our suppliers and customers who are equally committed to ensuring a strong US supply chain for the solar industry.

Best Regards

Matt Card  
President  
Suniva, Inc.
