Dear Speaker Johnson & Minority Leader Jeffries:

Aeroflow Health is a personalized health partner that provides Americans with easy access to medical equipment and supplies, especially our nation's most vulnerable, who rely on Medicare and Medicaid to receive healthcare. As a trusted leader in the durable medical equipment industry, we would like to express our support for H.R. 1968, the Full-Year Continuing Appropriations and Extensions Act of 2025, particularly as it pertains to the funding of Medicare and Medicaid programs. These essential programs provide critical healthcare coverage for millions of Americans, including seniors, low-income families, and individuals with disabilities. Ensuring their continued funding is a matter of both economic stability and moral responsibility.

Medicare and Medicaid serve as lifelines for vulnerable populations, offering access to necessary medical services, prescription medications, and preventive care. Any interruption in funding due to a lapse in appropriations would have dire consequences, potentially disrupting healthcare services, delaying provider reimbursements, and placing undue stress on families who rely on these programs for their well-being.

There are a significant number of priorities that affect the ability for Aeroflow to provide the best service to our patients, such as the need to expand telehealth to lactation providers and registered dietitians, ensuring appropriate payments are made for durable medical equipment through CMS, among others, ensuring a continuation of services by avoiding a government shutdown is an important step that allows Committees of jurisdiction to appropriately deliberate on oversight and appropriations looking forward to Fiscal Year 2026.

By investing in the durable medical equipment industry, Medicare and Medicaid help prevent costly emergency room visits and hospitalizations, ultimately saving taxpayer dollars. Ensuring the seamless continuation of these services supports both public health and fiscal responsibility. Additionally, Aeroflow Health would like to partner with Congress to bring to light issues affecting healthcare in America, and how to overcome these challenges in cost-effective ways.

Thank you for your attention to this urgent matter. Aeroflow Health appreciates your leadership and dedication to ensuring the health and well-being to millions of Americans who depend on Medicare and Medicaid for their health and security.

Respectfully,

Casey Hite  
Chief Executive Officer  
Aeroflow Health
