RE: Support and Key Vote for HR 6945

January 19, 2025

Dear Member of Congress,

National Right to Life strongly supports the Supporting Pregnant and Parenting Women and Families Act. **National Right to Life urges you to vote YES on this important legislation and will score this vote as a key vote.**

Pregnancy centers play a vital role in supporting women, children, and families by providing practical assistance, education, and resources during pregnancy and early parenthood. These organizations offer compassionate, community-based support such as pregnancy testing, prenatal education, counseling, diapers, baby clothes, and other material assistance that helps families thrive.

The Supporting Pregnant and Parenting Women and Families Act provides a necessary clarification to existing law. While states are not required to fund pregnancy centers, this legislation ensures that states that choose to do so are not barred or discouraged from partnering with these effective, life-affirming organizations.

At a time when families are facing increased economic pressure, Congress should be empowering, not restricting, states that wish to support organizations meeting real needs in their communities. This legislation promotes flexibility, fairness, and common sense.

For these reasons, National Right to Life urges you to **vote YES on the Supporting Pregnant and Parenting Women and Families Act. This vote will be considered a key vote for our organization.**

Thank you for your continued commitment to defending life and upholding policies that reflect the conscience rights of millions of Americans.

Respectfully submitted,
